

**OUR TOOLING SOLUTIONS ARE BACKED BY THE WORLD'S
LARGEST INDEPENDENT MACHINE TOOL MANUFACTURER.**

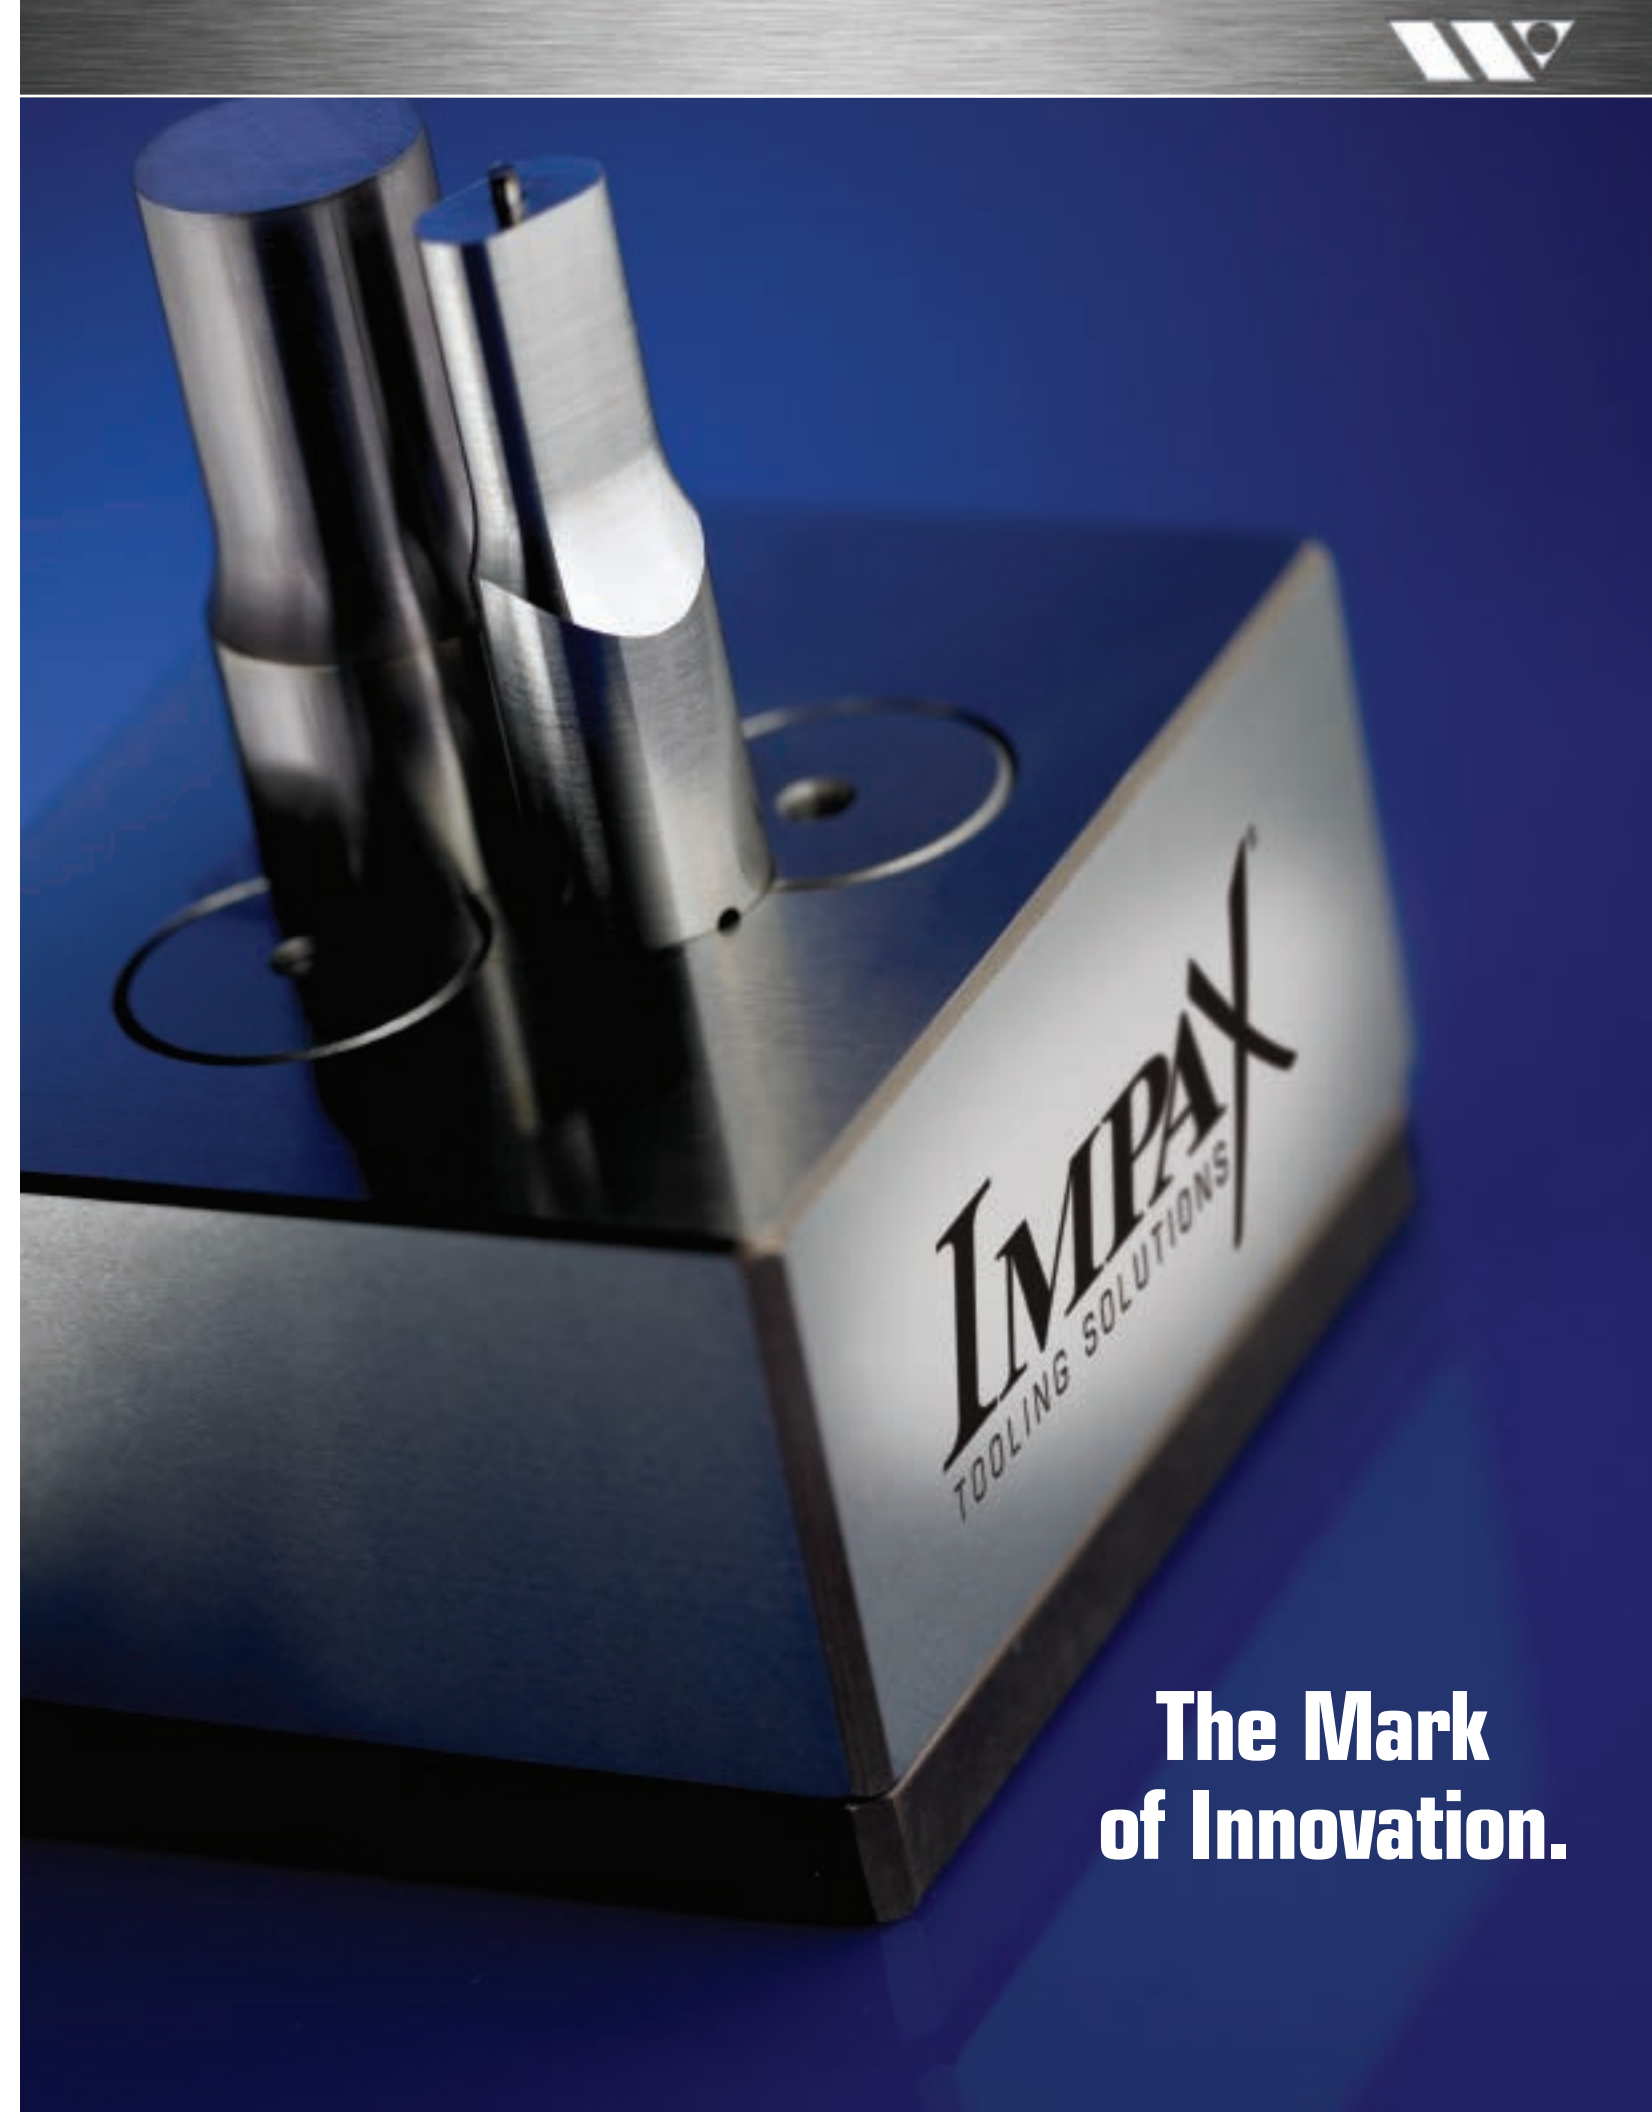

For more than 40 years, Wilson Tool International® has provided industry-leading tooling solutions that enhance the performance of sheet metal fabricating machinery worldwide.

The four divisions of Wilson Tool – Punch Press, Press Brake, Impax Tooling Solutions® and Xtra – represent the most comprehensive line of tooling systems and accessories available. Our ability to consistently provide innovative, high quality products that outlast and outperform the competition is why the world's most successful fabricators rely upon Wilson Tool tooling systems.

A knowledgeable global sales force, multilingual customer support staff, same-day shipping and extensive distribution network are just a few of the benefits that keep our customers coming back time and again.

**The Mark
of Innovation.**

WE'RE MAKING A MAJOR IMPACT ON METAL STAMPING PRODUCTIVITY.

A complete range of metal stamping tooling solutions.

Impax Tooling Solutions® manufactures a full selection of high quality punch and die components, including standard shapes, round tip forms and special 2D shapes. We also offer the widest selection of special shapes available anywhere. Every Impax Tooling Solutions punch and die component is engineered using our state-of-the-art CNC manufacturing process to produce a superior finish and greater precision. M2 tool steel is standard on all headed punches, though alternate M4, 3V and 10V performance tool steels are also available for the most demanding applications.

Our industry-leading innovations are lengthening tool life and shortening downtime.

From our sales engineers working with stampers on a daily basis to our industry-leading devotion to R&D, Wilson Tool is focused on developing innovative products that improve your productivity and lower your costs. Ideas are fostered from every individual, department and division, keeping Wilson Tool technology consistently on the cutting edge.

Our exclusive Optima® coating increases hits between sharpenings and multiplies tool life by up to 10 times. Slug Hugger™ dies virtually eliminate slug-pulling. HP Ball Lock™ is the only tooling line to offer M4 powdered steel standard on all punches for unbeatable wear resistance. And our HP Accu-Lock™ retainer inserts allow you to create, modify and reuse special retainers on-site and on demand, cutting costs and lead times.

Our customer service gets you what you need, when you need it.

Customer service is paramount to the success of Impax Tooling Solutions. We offer direct access to highly experienced application engineers and sales desk professionals that will help you get

exactly what you need. Our state-of-the-art manufacturing process, in-house Optima® coating system and laser marked tooling make ordering and reordering your tools fast and easy. Same day shipping on standard orders means more uptime.

Our e-Business Center makes doing business with us a snap (or a click).

The new e-Business Center at www.wilsontool.com/ebiz makes doing business with Wilson Tool more convenient than ever before. A simple click of the mouse gives you access to online features designed to save you time and keep you organized. Request a quote. Place an order. Review your account history. Track a shipment. With Wilson Tool e-Business, everything you need is right at your fingertips – 24 hours a day, 7 days a week.

Impact your stamping performance with Impax Tooling Solutions.

Unmatched durability, unparalleled customer service and an unwavering commitment to innovation make Impax Tooling Solutions the clear choice to increase your uptime and reduce your costs.
