

TWICE THE LIFE, TWICE THE VALUE.

WILSON 2-4-1

Delivering Maximum Value.

There is no greater value than the Wilson 2-4-1 tooling system. With punches and dies that offer twice the amount of grind life, Wilson 2-4-1 tooling delivers maximum value along with the assurance of quality and accuracy offered by Wilson Tool. Wilson 2-4-1 is like getting two tools for the price of one.

Rely on the Wilson 2-4-1 for:

- Dies that incorporate a die holder, die insert and shim pack to offer twice the grind life
- Reduced cost and increased versatility. No die adapters are needed. Replace the die insert only when changing shape, dimension or clearance.
- Fast deliveries on 2-4-1 tooling for Trumpf®, Pullmax®, Boschert®, Euromac and Haco Omes punch presses.
- Punches with a unique high precision spacer design that increase grind life to an unprecedented .236" (6mm)
- Keyed punches that load directly into the punch press to eliminate setting errors.
- Punches and dies made of high speed steel to allow more hits between tool sharpenings and reduce downtime. Optima® coating is available on all punches for maximum tool life and galling resistance.

Strength. Performance. Innovation.
