# REDUCE SETUP TIME WITH CLAMPING SOLUTIONS FROM WILSON TOOL.

*Minimizing setup time is key to achieving greater press brake productivity. Wilson Tool offers a variety of innovative clamping solutions designed to help fabricators dramatically reduce the amount of time spent loading and unloading press brake tooling. We offer the toughest, most reliable clamping solutions in the industry.*

*Whether you're looking for cost-effective mechanical clamping, simple push button setups or an ultra-fast hydraulic solution, Wilson Tool has a clamping system to meet your needs.*

## **Increase Productivity on Your Existing Press Brake with the ExpressRail™ Clamping System.**

Reach new levels of productivity on your existing press brakes with the new ExpressRail™ hydraulic clamping system from Wilson Tool. Simply load your tooling then press the button on the wireless pendant control to automatically clamp and seat your press brake tooling in seconds – enabling your operators to spend more time bending and less time setting up.

Available for both American and WT styles of tooling, ExpressRail features a unique low-profile design that doesn't eat into the open height required for larger parts – increasing your bending capacity. Plus, the ExpressRail hydraulic power unit is the most dependable on the market.

## Get Your Press Brake Up to Speed with the PowerExpress® Hydraulic Clamping System.

Ideal for virtually any American style tooling, the PowerExpress hydraulic clamping system offers lightning fast changeouts, easy installation, long-term reliability and increased bending capacity — everything you need to maximize your press brake performance right at your fingertips.

Our unique hydraulic clamping system makes tool changes faster than ever by enabling operators to clamp and seat tooling in a single operation. Modular two-foot sections make installation quick and easy. Plus, our Nitrex® surface enhancement extends clamp life by several times that of untreated beams.

## Save Time and Money with the Wilson Express Clamping System.™

Loading punches is a snap with Wilson Express Clamps. Simply place long punches or individual pieces of sectionalized punches under the clamps and push them upward. The spring-loaded clamps capture the punch via safety groove and hold it in place until the clamps are locked. To lock clamps, simply push the removable lever upward.

Available for virtually any make and model of press brake, the Wilson Express Clamping System is uniquely designed to increase your productivity and reduce your operating costs.

**Reduce your setup times with a clamping solution from Wilson Tool.**

# PRECISION TOOLING. UNBEATABLE PERFORMANCE.

For more than 40 years, Wilson Tool International® has provided industry-leading tooling solutions that enhance the performance of sheet metal fabricators and stampers worldwide.

The three divisions of Wilson Tool – Punching, Press Brake, and Stamping – represent the most comprehensive line of tooling systems and accessories available. Our ability to consistently provide innovative, high quality products that outlast and outperform the competition is why the world's most successful fabricators rely upon Wilson Tool tooling systems.

A knowledgeable global sales force, multilingual customer support staff, same-day shipping and extensive distribution network are just a few of the benefits that keep our customers coming back time and again.
