

# SPEED PRESS BRAKE SETUPS.

## EXPRESSRAIL™ CLAMPING SYSTEM

Reach new levels of productivity on your existing press brakes with the new ExpressRail™ hydraulic clamping system from Wilson Tool. Available for both American and WT styles of tooling, ExpressRail clamping systems enable operators to spend more time bending and less time setting up.

### Wireless Control

Simply load your tooling then press the button on the wireless pendant control to automatically clamp and seat your press brake tooling in seconds.

### More Open Height

ExpressRail clamping systems feature a unique low-profile design that won't eat into the open height required for larger parts – increasing your bending capacity.

### Made Stronger for Longer Life

Every ExpressRail clamping system is treated with Wilson Tool's exclusive Nitrex™ high endurance surface enhancement, providing enhanced corrosion resistance and extended clamp life.

### Unmatched Reliability

The ExpressRail power unit is the most dependable on the market. Controlled through a unique wireless pendant, the hydraulic power unit monitors fluid levels and issues a warning if they fall below acceptable levels.

### Bring Your Press Brake Up to Speed.

Increase uptime and enhance productivity on your existing press brake with the ExpressRail hydraulic clamping system from Wilson Tool. For more information, call **1.800.445.4518** or visit [www.wilsontool.com](http://www.wilsontool.com).
