

WILSON WORK STATION

WILSON WORK STATION

The Wilson Work Station

In pursuit of increased productivity and improved performance, Wilson Tool has developed a work station that provides an efficient design that stands ready to conquer whatever challenges you throw at them. With their heavy duty construction, they will stand up to the harshest work environments. Our industrial work stations also offer a flexible selection of standard components and cost-effective custom configurations that will allow you to customize your environment.

- Ergonomically designed - easy, safe access with a minimum of stress and strain
- Compatible with a full range of above-the-worksurface accessories
- Customizable drawer compartments
- Heavy duty welded legs
- Ergonomic drawer handles, improve safety, appearance and usability
- Heavy duty construction of welded steel structures and ball bearing drawers
- Powder coated paint for durability
- Efficient placement of components to maximize workflow

Lean Tip: Get in the Zone

Work is handled most efficiently when kept within areas defined as primary reach zones. These are the horizontal and vertical areas that a worker can reach with minimal arm, head, or trunk movement. Moving away from these primary zones requires more movement, and ultimately more time.
