Innovation

"We've revolutionized our process to help fabricators compete more efficiently by getting the tools they need in their hands as fast as possible."

– Brian Robinson, CEO, Wilson Tool

strength

"Wilson Tool has demonstrated an unwavering commitment to innovation not only through products and service but also in its markets served. Our focus has always been on what is best for our customers."

– Colin Blackwell, Managing Director European Operations

STRENGTH OF GLOBAL PROPORTIONS

Wilson Tool International® is the world's largest independent manufacturer of tooling systems for punch presses, press brakes and punch and die components for the stamping industry. Since 1966, we've dedicated ourselves to creating innovative tooling solutions that last longer and increase productivity for the world's most successful fabricators and stampers.

What began as a simple tool and die shop in the basement of a warehouse in St. Paul, Minnesota has evolved into a global leader in the industry. Today, Wilson Tool operates in virtually every industrialized nation in the world, from our manufacturing facilities in the United States, United Kingdom and China to our sales offices in the USA, UK, France, Germany, Denmark, Argentina and Asia Pacific. Wherever you are, Wilson Tool is there.

Customer service is the cornerstone of Wilson Tool's strength. Our customers have

access to the largest international team of sales engineers serving the sheet metal industry. Our sales desk employees are the most highly trained in the industry. They are also multi-lingual, making it possible to communicate in most languages throughout North America, Central and South America, Asia, Europe and beyond.

Our commitment to customer service doesn't end at the sales desk. Wilson Tool continually pursues new ways to make our customers more productive. We were the first in the industry to offer same day service. And our e-Business Center is transforming the way our customers do business with us.

Most importantly, when you work with Wilson Tool you will experience the "can do" attitude that sets us apart from the rest of the industry. Our mission is to create solutions that help you become more productive and profitable. We leave no question unanswered and no concern unaddressed.

"In my opinion, Wilson tools are the best value for the money."

– Jack Handeland, Generac Power Systems, Inc.

PERFORMANCE-DRIVEN SOLUTIONS

Wilson Tool is committed to helping our customers improve their performance and increase their productivity by providing the highest quality tooling solutions. We still view designing and manufacturing tooling as a craft. Our highly skilled engineers and toolmakers combine unmatched experience with sophisticated, specialized manufacturing systems to produce products that meet the challenges of our customers' most demanding applications.

Whether you need a standard catalog item, slight modification or complete custom tooling, we view each application as an opportunity to advance the state-of-the-art in tooling technology. Each step forward makes you that much more productive.

Our manufacturing facilities in White Bear Lake, Minnesota, USA; Swindon, England and Shanghai, China are among the most modern and well-equipped in the industry. We maintain strong relationships with prominent machine tool manufacturers from around the globe to ensure that we are continually on the cutting edge of manufacturing technology.

Wilson Tool combines state-of-the-art manufacturing premium tool steels and exclusive coatings. This unique combination produces performance-driven tooling that is more durable and longer lasting than any other tooling on the market – giving you more value for your money.

"Ken Wilson never said 'no.' He would always test an idea. That spirit continues to inspire our entire workforce to this day."

– Bob Haskins, President, Wilson Tool

innovat

tion

INDUSTRY-LEADING INNOVATIONS

Wilson Tool is focused on developing innovative solutions that improve productivity and lower costs for fabricators and stampers worldwide. Ideas are fostered from every individual, department and division. As a result, Wilson Tool holds more than 40 patents for tooling solutions that have revolutionized the industry.

Punch Press Tooling

The Wilson High Performance™ (HP) tooling, with our patented push button adjustment technology, quick release stripper plate and hardened steel construction, is the most advanced turret tooling in the industry. Our high precision line of Trumpf® style tooling, which includes the 2-4-1™ Tooling System, gives your machine greater flexibility and offers at least twice the life of standard tools. Our Optima® coating, Ultima® premium tool steel and groundbreaking Wilson Wheel® series are just a few of the reasons our punch tooling outlasts and outperforms the competition.

Press Brake Tooling

Our American Precision® press brake tooling is the first and only tooling in the industry to offer staged bending for ultimate versatility and performance. Our European Precision tooling is quickly becoming the

standard by which all other press brake tooling is measured. Clamping innovations such as Wilson Express Clamps® and the PowerExpress® hydraulic clamping system are carefully designed to speed setups and reduce operating costs. And our exclusive Nitrex® surface enhancement dramatically increases tool life.

Stamping Components

Our Impax Tooling Solutions® line offers a complete range of the highest quality punch and die components for the metal stamping industry. HP Accu-Lock™ retainer inserts allow stampers to create, modify and reuse special retainers on-site and on demand, cutting costs and lead times. Slug Hugger®2 dies virtually eliminate slug-pulling. HP Ball Lock™ is the only tooling line to offer M4 powdered steel standard on all punches for unbeatable wear resistance. And our exclusive Optima® coating increases hits between sharpenings and multiplies tool life by up to 10 times.

Innovation is not just a concept. It's the driving force behind everything we do. With each new technology we introduce, Wilson Tool continually raises the bar for reliability and performance.
