

# THE BEST GETS BETTER

## Wilson HP Upgrade

### Wilson HP Gets An Upgrade

Wilson Tool has made several significant upgrades to the most popular line of punch press tooling in the world - Wilson High Performance (HP) tooling. The enhancements include:

#### Faster, Easier Punch Adjustments

Our new HP2 spring pack delivers best in class features for small station driver assemblies:

- Fast and accurate tool length adjustment in .005 increments with no tools or buttons
- Increased punch length adjustment
- 100% compatible with current Wilson HP guides and punches
- Allows operators to adjust punch length *in the turret*
- Tool-less guide removal
- Highest stripping pressure available

#### Extended Grind Life

We have modified our punches to ensure that you are able to reach the maximum amount of grind life on each and every Wilson Tool punch. No one in the industry offers more grind life than Wilson Tool.

#### Tougher Tool Steel

We have refined our WB tool steel to ensure that our standard tooling is the toughest, most durable in the industry (not currently available in Europe).
