

“WE’RE SAVING A LOT OF TIME WITH **POWEREXPRESS.**”

“The PowerExpress™ hydraulic clamping system has been great. It grips the tools perfectly. You don't have to crank a bunch of nuts to get things cinched down. It just makes everything a lot quicker and easier when you're sectioning tooling. I'm a custom job shop, so every time I go to the brake I'm changing tooling around. And even during the course of one project I'm doing several tool changes. So PowerExpress really makes it quick and easy. I love it!”

Clamp and seat your American style press brake tooling in one easy operation with the PowerExpress

hydraulic clamping system from Wilson Tool. Our advanced hydraulic clamping system provides quick changeouts and long lasting reliability. Modular 2-foot sections make clamp installation a snap. And every PowerExpress clamping system includes Wilson's exclusive Nitrex® surface enhancement for longer clamp life.

For more information on the PowerExpress hydraulic clamping system, call 1.800.445.4518 or visit [www.wilsontool.com](http://www.wilsontool.com).

**Strength. Performance. Innovation.**
