

**“IMPAX WAS THE ONLY TOOLING  
THAT REACHED  
THE NECESSARY LEVEL OF PRECISION.”**

“An engineering change required that our belts achieve a tighter fit, so we needed to procure more accurate thread form tools. We shopped around for a tool supplier. Impax was the only one willing and able to reach the necessary level of precision. The Impax team worked tirelessly to overcome the obstacles we faced. They developed a tool that provided a more precise fit, enabling us to meet the new, more stringent torque specifications.”

Impax Tooling Solutions® leads the industry by providing service driven tooling solutions. By working closely with its customers, the Impax team is able to develop innovative, cost effective solutions to the most difficult of stamping problems.
