**“ WE GAVE WILSON TOOL A UNIQUE REQUEST
AND THEY REALLY
CAME THROUGH FOR US.”**

“We’ve been using Wilson punch press tooling for more than 15 years. We liked Wilson’s European style tools and tool holders so well that we wanted to use them in our new “C” series Trumpf® press brake. At our request, Wilson developed an Express Clamp that allows us to use Wilson European style tooling in our Trumpf press brake. The result is a superior product that allows us to do high quality work more efficiently.”

Longer tool life, less scrap and quick set-ups are what make the Wilson Tool European Style Press Brake Tooling the first choice of fabricators worldwide. Wilson’s unique

clamping system, state-of-the-art manufacturing and exclusive Nitrex™ surface enhancement gives you better tooling for your money.
