

“WE’RE PHASING OUT  
THE COMPETITION AND GOING  
**EXCLUSIVELY**  
WITH **IMPAX TOOLING.**”

“We’ve had very, very good success with HP Accu-Lock Retainer Inserts™ by Impax Tooling Solutions®. We’ve been phasing out the competitor’s retainers and replacing them with Accu-Lock because we run a lot of tight tolerance cutting clearances here and Accu-Lock retainer inserts give us the highest precision. We’ve also seen

great success with the Slug Hugger® dies. We have yet to have one not work like they said it was going to work. And that means a lot to us because pulling a die out of production to fix a slug pulling issue means a lot of time, money and extra pressure on the tool room that we don’t need.”

Impax Tooling Solutions® manufactures the highest quality stamping solutions available anywhere. Our HP Accu-Lock Retainer Inserts allow you to create, modify and reuse special retainers on-site and on demand, cutting costs and lead times. Slug Hugger dies virtually eliminate slug-pulling, reducing downtime and improving productivity. Every Impax product is backed by the industry’s best customer service.
