

“WE HAVE CUSTOMERS TURNING  
**CARTWHEELS**  
OVER ACCU-LOCK® RETAINER INSERTS.”

“Being a design and build house, HP Accu-Lock Retainer Inserts give us the flexibility to make engineering changes for our customers quickly and easily. Our customers are stamping houses that run the tools we build. When we started putting the inserts in some of our dies and they saw what we could do with

those little Accu-Locks they were like, this is what we've been looking for. Using Accu-Lock Retainer Inserts makes more sense; it's more economical; it's very user-friendly, and it's always a sell. We have a cheaper way of making something, which saves us time and let's us be more competitive.”

Purchasing custom retainers for a special request is costly and can add weeks to a job. With HP Accu-Lock Retainer Inserts, you can not only create your own special retainers in-house but also modify and reuse existing retainers. HP Accu-Lock Retainer Inserts are fully compatible with all ball lock punches, including HP Ball Lock punches from Impax Tooling Solutions.
