

INVENTORY MANAGEMENT POWERED BY CRIBWARE®

In today's complex manufacturing world, having the correct tooling to keep your facility running is critical. Wilson Tool International recognizes the need for a consistent, predictable supply of the reliable and innovative products and solutions you've come to expect from us. With this in mind, Wilson Tool leverages the power of the industry-leading tool management software, CRIBWARE® to deliver all the inventory features you need to maintain your tooling. We see this partnership as an investment in our customers' future success; increasing your productivity and deepening our commitment to you.

CRIBWARE is a proven software and storage solution that makes you more efficient by lowering costs and saving you time. Our centralized database system provides:

- **An Item Catalog:** Your personalized tooling list with multiple descriptive, pricing, supplier/manufacturer fields
- **Location Availability and Status:** Maintain multiple bin locations in cabinets or on shelves, at toolroom, cribs and other storage areas
- **Usage/Cost Tracking:** Trace item usage to employees, departments, machines, jobs and operations
- **Inventory Control:** Monitor min/max reorder requirements versus your on hand inventory levels
- **Automated Replenishment:** Manage the purchasing process from need notification to receipt history
- **Integrated Drawings/Documents:** Attach many different document types
- **Performance Analytics:** Over 400 reports and analysis tools to tap into key historic and predictive information

CRIBWARE software ensures you always have what you need, when you need it, and never too much.

KNOW WHAT YOU HAVE

Material description and classification is the foundation for your successful tool management installation. Multiple inventory fields tell you how many pieces you have, when to order more, how many are on order and who your vendor is. With CRIBWARE, you know what items you have and what you need with real-time information stored in a centralized database.

Tooling and components can be traced to their point of use. CRIBWARE supplied by Wilson Tool puts you in control of your tooling, inventory and processes.

Item Master Catalog

The CRIBWARE software maintains a comprehensive list of tools, springs and components in a master catalog. Multiple information fields provide a complete picture of each tool:

- Item part number
- Multiple description fields
- Cost/Price
- Item storage location
- Min/Max inventory levels
- Quantity of items
- Reference number
- Manufacturer name and part number

KNOW WHEN TO REPLENISH

Replenishment is crucial to your efficient operation. The cost of “running out” is usually many more times than the cost of the material. The real cost of a stock out includes down time, fire fighting and expediting. CRIBWARE inventory control tracks issues, returns and receipts, and notifies you when an item falls below its designated on-hand stock level. The item is added to a reorder list so that purchasing managers know when to order, eliminating untracked or sporadic buying habits. You can view reports on open orders, vendor commitments, order timing and past due items.

KNOW WHERE IT IS

Take the guesswork and busywork out of tracking your inventory. Whether it's perishable or durable material, you want to know where it is. Usage can be tracked by employee, die number and up to five additional fields. Because item location and real-time quantities can be viewed at any time, tooling and components can be traced to their point of use.

Bar Code Simplicity

Bar coding is a complementary technology that increases the efficiency and effectiveness of your Wilson Tool CRIBWARE system. Screens are designed with bar code scanners in mind, facilitating work-flow ultimately making your job is easier.

There is a complete line of laser scanners and linear imagers to read information, reducing the monotony and errors of data input.

Powerful Reporting

Harnessing the power of Crystal Reports to present information that is powerful, interactive and easy to navigate, CRIBWARE delivers information on all your tooling processes, including usage, purchases and on hand inventory levels. With over 400 reports available, CRIBWARE provides the power to report, analyze, document and export information for further analysis and review.

CRIBWARE grows with you

Add the functionality you want, when you need it.

- **Purchasing and Receiving** – Automate and ensure the replenishment of material
- **Kitting and Assembly Control** – Group items for easier and faster issues and returns
- **Rework/Repair/Scrap Control** – Manage the condition of your tooling, record expenses and keep track of your regrind/resharpening activity
- **Job Management** – Track job costs, document operations and assure availability of tooling
- **Maintenance Management** – Manage assets, schedule work orders, and track service activities
- **Inventory Adjustment** – Compensate for human and process errors by cycle counting
- **Documents, Pictures and Drawings** – View material documents to assist in the management and use of tooling material
- **Secure Storage** – Wide range of storage options for point-of-use convenience

INVENTORY MANAGEMENT

INVENTORY MANAGEMENT POWERED BY CRIBWARE®

Blending on-site expertise from our Wilson Tool sales engineers and remote services from our partner Applied CIM Technologies, Inc., we are able to deliver a simple yet comprehensive experience that enables a quick implementation with lasting results.

Wilson Tool Inventory Management program provides:

- An industry leading tool management software
- Bar code scanner for easy tool checkout
- Data population services for Wilson Tool products
- Min/max item consultation for successful reordering
- User training to ensure success
- Powerful inventory and usage reports
- Ongoing program reviews

Our partners at CRIBWARE collaborate to deliver:

- Web-based or on-site installation and training
- Data population and implementation assistance
- Phone and email support
- Remote access support
- Ongoing software upgrades

At Wilson Tool, we believe in the importance of the human factor in providing a top-quality inventory software solution. As one of our customers, your designated sales engineer will first listen to your needs. Then they provide recommendations, gather tool and inventory information and empower you to use CRIBWARE with confidence. We get you up and running efficiently, so you can complete your tasks quicker.

For more information, visit wilsontool.com, call our tooling technicians at 800-944-4671 or contact your sales engineer.
